

ABDUL SAMAD

+91 91403 46582 | abdulsamad9040474@gmail.com | [LinkedIn](#) | [LeetCode](#) | [GitHub](#)

Summary

Software developer skilled in building AI-powered web applications and interactive tools. Proficient in Java, Python, and JavaScript with experience in development and machine learning.

Educational Qualification

United Institute of Technology, Prayagraj

Bachelor of Technology in Computer Science & Engineering || CGPA: 7.7

Specialization: Artificial Intelligence & Machine Learning

2023 – Present

Allahabad Public School & College, Prayagraj

Senior Secondary || CBSE || Percentage: 68%

2022 – 2023

Secondary || CBSE || Percentage: 69%

2020 – 2021

Trainings

Generative AI using NLP, United Global Infoservice Pvt. Ltd., Prayagraj

August 2025

- Learned NLP fundamentals including tokenization, stemming, stopword removal and TF-IDF
- Applied concepts through a Machine Learning-based SMS Spam Detection approach

Python with Data Science, United Group of Institutions, Prayagraj

August 2024

- Gained hands-on experience in Python programming, Tkinter GUI development and data handling
- Developed GUI-based applications and practiced problem-solving using Python

Projects

AI Resume Analyzer

Live | [GitHub](#) | Mar 2026

- Built an **AI-powered resume analyzer** with **dynamic UI**
- Implemented **resume parsing** with **skill extraction & keyword optimization**
- Integrated **AI insights** for **resume scoring, ATS analysis, and suggestions**
- **Tech Stack:** React, Tailwind CSS, JavaScript, AI APIs, Vercel

SMS Spam Detection System (NLP & Machine Learning)

Live | [GitHub](#) | Aug 2025

- Built an end-to-end SMS spam detection system using **NLP** and **Naive Bayes**, achieving **(97% accuracy)**
- Implemented text preprocessing and **TF-IDF** feature extraction for effective model training
- Developed a **Flask REST API** with confidence scores, integrated a responsive web UI and deployed on **Vercel** for real-time access
- **Tech Stack:** Python, NLP, TF-IDF, Naive Bayes, Flask, HTML5, CSS3, JavaScript, Vercel

Hangman Game Python to Web (JavaScript + Canvas)

Live | [GitHub](#) | Aug 2024

- Developed a **Hangman game** with an interactive GUI and later **migrated it to a browser-based version**
- Implemented **dynamic word rendering and gameplay logic** using **Canvas-based graphics**
- Deployed the application with a **live demo** for public access
- **Tech Stack:** Python, Tkinter, HTML5, CSS3, JavaScript, Canvas API, Vercel

Skills

Programming: Java, Python, JavaScript, SQL

Web Development: HTML5, CSS3, JavaScript, REST APIs

Frameworks & Tools: Flask, Git, GitHub, Vercel, VS Code, Jupyter Notebook

Machine Learning / NLP: TF-IDF, Naive Bayes, Text Preprocessing, Model Evaluation

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS

Soft Skills: Problem Solving, Team Collaboration, Adaptability, Leadership

Certifications & Achievements

- 🏆 **Google Cloud Skills Boost:** Completed GCP labs and cloud fundamentals, earned official swags
- 🏆 **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional - Oracle (2025)**
- 🏆 **AWS - Solutions Architecture Job Simulation - AWS (2025)**
- 🏆 **Data Visualisation: Empowering Business with Effective Insights - The Forage (2024)**
- **UHack 4.0 Hackathon:** Selected among Top 65 out of 250+ participating teams
- **Event Head - Enigma, College Fest:** Led teams and managed event execution
